CHRYST AFANGBEDJI

SOC Analyst | Cybersecurity Analyst | Security+ | CySA+ | eJPT
Pittsburgh, PA | (412) 320-6422 | cea1013@sru.edu | linkedin.com/in/chryst-afangbedji

SUMMARY

Cybersecurity student with SOC internship experience in alert triage and phishing analysis, plus home labs building detection pipelines in **Splunk** and **Microsoft Sentinel**. Seeking an entry-level SOC or Cybersecurity Analyst role.

EDUCATION

Slippery Rock University | Expected May 2027
B.S., Cybersecurity | *NSA CAE-designated program* | Slippery Rock, PA

CERTIFICATIONS

- **CompTIA CySA+** (CS0-004) | Expected Nov 2026
- **CompTIA Security+** | Feb 2026
- **eJPT** (INE) | Aug 2025

TECHNICAL SKILLS

- **SIEM & Detection:** Splunk, Microsoft Sentinel, KQL, Snort IDS/IPS, MITRE ATT&CK, log analysis, alert triage, incident response, phishing analysis, IOC analysis
- **Network Security:** pfSense firewall, Wireshark, Nmap, TCP/IP, DHCP, DNS, NAT
- **Identity & Cloud:** Active Directory, Windows Server 2022, Entra ID, Microsoft Azure, AWS, IAM, Mimecast
- **Systems & Scripting:** Kali Linux, Ubuntu, Metasploit, ServiceNow, Python, PowerShell, Bash, Java, JavaScript

EXPERIENCE

PITT OHIO **May 2026 - Aug 2026**
IT&S Intern *Pittsburgh, PA*

- Triaged daily security alerts and performed phishing analysis and email threat triage in the **Mimecast** admin console, supporting incident response and reducing the number of phishing emails reaching users
- Provisioned and managed user access across **Microsoft Azure, Entra ID, and Active Directory**, resolving incidents and requests in **ServiceNow** and streamlining the provisioning process
- Supported **Citrix DaaS** virtual desktops and troubleshot end-user issues to reduce downtime

Slippery Rock University **Aug 2025 - Present**
IT Help Desk Technician *Slippery Rock, PA*

- Resolve an average of **30+ tickets per week** within SLA in **ServiceNow**, supporting students, faculty, and staff by phone, email, and in person while maintaining a **95% satisfaction rate**
- Troubleshoot hardware, software, and connectivity issues on **100+ campus devices** using remote-desktop tools, and use **Wireshark** for network analysis

CyberForce Competition (U.S. DOE) **Nov 2025**
Blue Team Competitor *Virtual*

- Defended **AWS**-hosted infrastructure in a live attack simulation; investigated alerts through log and network traffic analysis to detect and mitigate privilege escalation, misconfigurations, and exposed services

SECURITY PROJECTS & HOME LABS

Network Perimeter Defense & SIEM Monitoring Lab

- Secured a simulated 100-user domain that had no firewall, IDS, or central logging: deployed **pfSense** as the edge firewall (NAT, DHCP, filtering) and ran **Snort IDS/IPS** with GPLv2 Community rules
- Forwarded firewall and IDS alerts over syslog to **Splunk**, centralizing all domain security events in one SIEM for triage

Active Directory Enterprise Environment

- Built a **Windows Server 2022** domain controller (AD DS, DNS, DHCP) with a domain-joined Windows 10 client
- Onboarded **100 users** into an Employees OU with a **PowerShell** script instead of manual setup, and isolated admin rights in a dedicated privileged account

Cloud Threat Monitoring & Honeypot Lab

- Monitored a brute-forced, internet-exposed host with **Microsoft Sentinel** and wrote **KQL** to analyze thousands of failed logons and extract attacker IPs as IOCs
- Geo-enriched events with a Sentinel Watchlist and built a workbook map of attacker origins for faster triage

Exploitation of Web & Network Services

- Used **Nmap** and **Metasploit** on **Kali Linux** to exploit misconfigured FTP, SMB, and HTTP services and escalate privileges on lab targets

LEADERSHIP & ACTIVITIES

Cyberspace Club, Secretary (cybersecurity workshops and hands-on labs) | **Black Action Society**, Member
